

Instructions and Scoring for “Eat.Read.Love.” Online Scavenger Hunt

JASNA Eastern WA/Northern ID Region

Objective of the game: This game involves finding specific items from around the house and scoring points by showing them on the video camera. Extra points will be awarded as specified in the bonus of the question, usually by having a special version of the listed items. You will keep track of your own score. We will have three rounds of 10 items each. For each round you will go collect the items and then bring them back for a “show and tell” for the bonus items. For some clues, there’s a bit of knowledge required: You’ll have to know the answer to a question about Jane Austen or her writing to know what you need to find.

Instructions: Players turn their video cameras OFF when they go to get the items for each round. While the game caller reads the items in the round, players either write it down or follow the link in the chat for a written version of the clues for that round. When you have collected your 10 items, return to the Zoom meeting and turn on your video camera. Once people are back, we will have a show and tell for each item. Spectators can leave their cameras on for the duration of the game and chat while we wait for the players to return.
